

# Stationary Debris Shredder

## PRODUCT DESCRIPTION

The DS Series Stationary Debris Shredder is an inline waste shredder for pre-cleaning and mummy densification. This shredder is made compact to easily install in any pre-cleaning line. Available in 24", 30", 36", and 40" widths.

## PERFORMANCE

Great for reducing waste volume while creating compostable mulch. The Vrisimo DS Series Stationary Debris Shredder has a bolt on flange. Features and electronically balanced cutter drum for vibration free operation. Includes electric drive motor allowing easy intergration into your processing line.
