

BR Series Berm Brush

The BR Series Berm Brush is a great addition to an Orchard LP or SM Sanitizer to improve the effectiveness of your dormant orchard operation. The heavy duty brush is spring compensated and easily adjustable to stir up material just outside the mower path for more effective berm blowing. Paired with a BL series blower, this machine can produce the same effect as multiple passes with a sweeper and blower.

KEY FEATURES

- **Spring Adjustable Height:** fine-tunes the brush pressure for better berm blowing performance.
- **Toughness:** Durable and rugged design. Heavy gauge steel construction.
- **Precision:** Adjustable nozzle angle and height. Hydraulic actuation for airflow direction.
- **Low Profile:** Compact and portable design for easy maneuverability in narrow row spacing.
- **Compatibility:** Works with all Orchard LP and Sanitizer mowers.

BRUSH
42"

WIDTH
120" - 144"

HEIGHT
0" - 10"

The **hydraulic controls** of the Berm Brush provide flexibility by enabling directional blowing options in both left and right directions as needed.

The Berm Brush is easily adaptable and can be **fitted to any LP or Sanitizer mower**, enhancing their versatility for various land maintenance applications.

BR Series Berm Brush Specifications

Model #	BR-42
