

# RockHound Landscape Rake

The Rockhound 72B Landscape rake is the original skid steer implement designed to **remove rocks, level ground before sod is laid or prepare seedbeds**. It was one of the first five Bobcat® attachments more than 40 years ago. It eliminates hand raking and picks up rocks as small as 3/4" as well as most rocks up to 8". An optional adapter plate allows the Rockhound 72B-3 Landscape rake to be hooked up to a tractor with a 3-point hitch.

Landscape Rake Specifications		
Model #	72B	72B-3
Cutting Width	72"	72"
Overall Width	79"	79"
Weight	1450 lbs.	1500 lbs.
Tooth Bars	12	12
Teeth	484	484
Brush Capacity	12 cu ft	12 cu ft
Hydraulic Min	13 GPM	13 GPM

The rake's bar collect rocks and other debris into a bucket as soil is leveled. The T-1 teeth are mounted to a double channel replaceable/reversible bolt on tooth bar. The hydraulically operated bucket opens from the top for easy unloading, Skid shoes allow the operator to adjust the depth and limit wear.

## KEY FEATURES

- **Utility:** Picks up rocks and debris and puts them in the bucket.
- **Simplicity:** Hydraulic cylinder opens top cover for easy dumping and grading.
- **Efficiency:** Rake bars and cutting edge provide better leveling for longer ground contact.
- **Ease:** Replaceable, bolt-on, reversible tooth bars are standard.
- **Toughness:** High-strength T-1 teeth.
- **Versatility:** A 3-point hitch is available for use behind tractors (optional)
