

Sanitizer Orchard Mulcher

For nut growers seeking a rejuvenated start in the spring, the Vrisimo Sanitizer provides the perfect solution. As an essential tool in orchard sanitation, it plays a vital role in **pest control**—especially against **Navel Orange Worm** in **almond, walnut, and pistachio orchards**. By removing unharvested nuts, mummy nuts, and lingering wood debris, the Sanitizer eliminates the primary overwintering sites where NOW larvae survive and spread.

This thorough cleanup not only reduces pest pressure but also supports healthier orchards, improved yields, and more efficient harvest seasons. With a single efficient pass, growers can significantly lower the risk of costly infestations and maintain cleaner orchard floors.

Navel Orange Worm damage can cost growers thousands of dollars each year. Eliminate NOW in one pass.

Cut Width

120-144"

Weight

2,790-3,264 lbs

HP Required

75-85

Mow Height

0-4"

KEY FEATURES

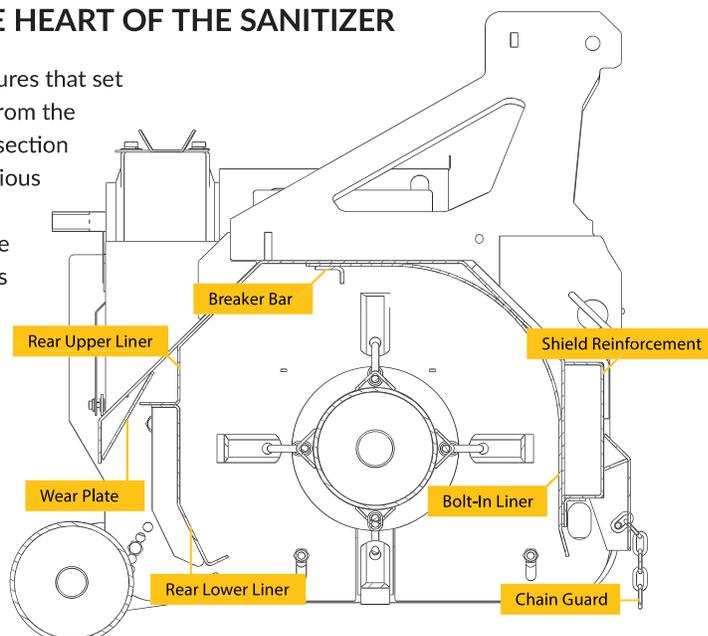

- **Bolt-in Abrasion Resistant Liner:** To withstand harsh environments and be easily replaced.
- **Durability:** Chain inlet front curtain adds long life.
- **Internal Rear Lower Liner:** Further closes off the discharge area for maximum mulching.
- **Material Destruction:** Bolt-in breaker bars maximize mulching quality.

Sanitizer Specifications

Model #	SM2120-10	SM2144-12'
Cutting Width	10'	12'
Overall Width	11' 10"	13' 10"
Weight	2790 lbs.	3264 lbs.
Number of Knives	116-Slicer 58-Center	148-Slicer 74-Center
HP Requirement	75	85
