

# 50 Series Berm Blaster

The Berm Blaster is a robust and dependable piece of orchard and vineyard equipment engineered to clear berms with exceptional efficiency. Designed for use during the dormant season, it utilizes a powerful high-output fan to remove leaves, debris, and mummified fruit from the tree row. This thorough cleanup helps reduce pest and disease pressure while promoting a cleaner, more nutrient-rich soil berm.

**LENGTH**  
54"

**WIDTH**  
7' - 18'

**HEIGHT**  
53"

**AIR SPEED**  
135 MPH

Berm Blaster Flex Nozzles deliver adjustable, high-output air with hydraulic control, breakaway booms, and 14'-18' width. They attach tool-free and direct 135+ mph air for precise orchard cleaning.

Vineyard nozzles provide a compact 7' width for clearing under vines with tight row spacing.

## KEY FEATURES

- **High Output Dual Blowers:** Provides powerful, wide-reach airflow for fast and efficient berm cleaning.
- **Breakaway Brooms:** Flex around trees and obstacles to prevent damage and maintain smooth operation.
- **OSHA Compliant Guards and Housings:** Ensures operator safety while protecting internal components for long-term durability.
- **Adjustable nozzles:** Allows precise control of airflow direction for cleaner, more accurate berm blowing.
- **Category II Three-Point Mount with PTO Drive:** Offers strong tractor compatibility and reliable power transfer to run the entire system.

**Reinforced 2" Receiver:** Safely tows a spray rig, combining tasks and increasing productivity.

## 50 Series Berm Blaster Specifications

Model #	50-BLASTERBERM
Control	Left/Right
Actuation	Hydraulic
Weight	1300 lbs.
Nozzles	Breakaway, Spring Tension Adjustable
Hydraulic Remotes	2ea for Left/Right
Width	7 to 18 feet Adjustable
